

OBJECTIVE

I'm a final-year BSc (Hons) Data Science undergraduate at Sri Lanka Technology Campus (SLTC), with a strong interest in artificial intelligence, data-driven solutions, and digital innovation.

Alongside my academic studies, I have worked as a Top-Rated Freelancer on Upwork for over four years, providing virtual assistance, data handling, graphic design, social media marketing, and digital content creation services to international clients.

Through leadership roles in the Student Interactive Society, GET Sync Club, Rotaract Club, AIESEC, and the Sports Council of Sri Lanka Technology Campus, along with my role as a Microsoft Student Ambassador, I have built strong skills in leadership, communication, teamwork, event planning, and project coordination — skills that have helped me manage responsibilities, coordinate teams, and deliver results in dynamic environments.

I am currently seeking an internship in data analytics, artificial intelligence, or machine learning, where I can apply my academic training and hands-on experience to real business challenges.

DATA SCIENCE & TECHNICAL SKILLS

Programming Languages Python, Java, C, C++, JavaScript, TypeScript, Dart, SQL Databases & Cloud Firebase Firestore, Supabase, MySQL, SQLite, Docker (Fundamentals), AWS EC2 (Fundamentals) AI & Automation OpenAI API, Claude API, n8n, Make.com, Microsoft 365 Copilot IoT & Embedded Systems ESP32, Arduino, Embedded C	Data Science & Machine Learning Machine Learning, Deep Learning, Random Forest, XGBoost, Scikit-learn, Data Analysis, Big Data, PySpark, Statistical Analysis, Predictive Modeling, Generative AI Web & Mobile Development React.js, Node.js, FastAPI, Flutter (Dart), HTML, CSS, REST APIs, Android Studio Tools & Collaboration Git, GitHub, GitHub Flow, Jira, Power BI, Tableau (Basic), Microsoft Excel, Microsoft Fabric
---	---

PROJECTS

HEXSHOES — AI-Powered E-Commerce Platform Tech Stack: React, TypeScript, Node.js/Express, FastAPI, PyTorch, CLIP, Firebase - Building a full-stack e-commerce platform for a footwear brand with an AI-powered visual search feature using CLIP image embeddings and cosine similarity search. - Architected as a production-style system: React/TypeScript frontend, Node.js/Express backend, and a dedicated Python/FastAPI machine learning microservice.	Jul 2026 – Present
DevInsight — AI-Powered GitHub Analytics Platform Capstone Project Tech Stack: Python, Random Forest, XGBoost, GitHub API, Flutter Web, Supabase - Developing an AI-driven analytics platform that analyzes GitHub repository activity and CI/CD data to identify software project risks and generate actionable insights. - Applying ensemble machine learning models to detect bug-prone modules, classify issue priority, and analyze developer workload. - Building a cross-platform visualization dashboard using Flutter Web and Supabase, with LLM-generated explanations for actionable insights.	May 2026 – Present
XAI Fashion Design — Explainable AI-Driven Fashion Design Associated with SLTC Tech Stack: Python, Deep Learning, Generative AI, GAN, CNN, SHAP, LIME, Explainable AI (XAI) - Developing a deep learning research project focused on explainable AI-driven fashion design and demand-aware optimization. - Applying generative models and CNN-based techniques for fashion design, with SHAP and LIME to interpret model predictions and design decisions. - Exploring demand-aware optimization to generate fashion designs while providing transparent and interpretable explanations for AI-driven recommendations.	Aug 2026
ParkNet — Smart Parking System (IoT + Full-Stack Web) Associated with SLTC Tech Stack: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Clerk, Firebase, ESP32 - Designed and developed a smart parking management system integrating a physical IoT prototype with a full-stack web application. - Built a real-world prototype using ultrasonic sensors and ESP32 to detect vehicle presence, streaming live data to Firebase Realtime Database. - Implemented secure, role-based access for users and administrators using Clerk authentication.	Aug – Sep 2025

EDUCATION

BSc (Hons) in Data Science Sri Lanka Technology Campus (SLTC) Relevant coursework: Machine Learning, Deep Learning, Artificial Intelligence, Big Data, Natural Language Processing, Data Structures & Algorithms, Business Intelligence, Probability & Statistics.	2023 – 2027 (Final Year)
GCE Advanced Level - Commerce Stream Dharmapala College, Bandarawela	2019 – 2022

CERTIFICATIONS

- Microsoft Applied Skills: Get started developing agents in Microsoft Foundry — Microsoft (Aug 2026)
- Get started with AI applications and agents on Azure — Microsoft (Aug 2026)
- Implement Real-Time Intelligence with Microsoft Fabric — Microsoft (Jul 2026)
- Enhance your productivity with prebuilt Microsoft 365 Copilot agents — Microsoft (Jul 2026)
- Optimize business processes with Microsoft 365 Copilot — Microsoft (Jul 2026)
- Python for Beginners — Centre for Open & Distance Learning, University of Moratuwa (Dec 2025)

LEADERSHIP & ORGANIZATIONS

Microsoft Student Ambassador — Microsoft	Oct 2026 – Present
College Captain — Albert College, Sports Council of SLTC	Jun 2026 – Present
University Life & Internal Affairs Coordinator — Student Interactive Society, SLTC	Mar 2026 – Present
President — GET Sync Club of SLTC	Jan 2026 – Present
Degree Representative — BSc (Hons) Data Science, SLTC	Mar 2023 – Present
Executive Committee Member – Co-Editor — Rotaract Club of SLTC Research University	Jul 2025 – Jun 2026
Vice Chairman, IIR Division — GET Sync Club of SLTC	Nov 2024 – Nov 2025
Assistant Director of Club Services — Rotaract Club of SLTC Research University	Nov 2024 – Jul 2025
Lead Board Coordinator, Finance & Legal — AIESEC	Apr 2024 – Dec 2024

FREELANCE & DIGITAL SKILLS

Virtual Assistance & Admin Amazon Seller Central Management, Data Entry, Lead Generation, Administrative Support	Graphic Design & Social Media Canva, Photoshop, Figma, Social Media Marketing, Branding
AI-Powered Content & Automation OpenAI API, Claude API, Generative AI, MidJourney, n8n, Make.com, Microsoft 365 Copilot	

FREELANCE EXPERIENCE

AI Automation Developer (Independent) • Building website and social media automation systems for established businesses through freelance work. • Using n8n and Make.com integrated with the OpenAI and Claude APIs to streamline content and client workflows.	2026 – Present
Top-Rated Freelancer – Virtual Assistant & Designer Upwork · Freelance United States · Remote • Delivered virtual assistance, programming support, and graphic design services to international clients through the Upwork platform, maintaining Top-Rated status.	Jan 2022 – Present
Virtual Assistant KMF Business Advisors · Freelance United States • Support administrative coordination, data organization, online research, business content preparation, social media activities, and graphic design requirements.	Jan 2022 – Present
Virtual Assistant Liazon Marketing · Freelance United States • Provide virtual assistance, graphic design, social media content creation, data entry, and digital marketing support according to client requirements.	Jan 2022 – Present
